QUALITY ENGINEERING · BANKING DATA WAREHOUSE

Requirement Traceability Matrix

Banking ETL — BRD-to-test coverage and open requirements

DRAFT — PENDING HUMAN REVIEW

Project	Banking ETL Testing
Document version	1.0 — Initial draft
Prepared date	03-Nov-2026
Primary source	Banking Data Warehouse — Business Requirements Document v1.0
Supporting references	Banking ETL Test Strategy v1.0 and Test Plan v1.0; both Draft — Pending Human Review
Reference format	Provided RTM Creator SampleTemplate.md

The user authorized preparing this RTM using available draft documents as provisional references. This document does not approve the strategy, plan, requirements, or testing coverage.

1. Document Information

Version	Date	Prepared by	Status	Document notes
1.0	03-Nov-2026	QA / Test Planning (owner to confirm)	Draft — Pending Human Review	Ten requirements identified from BRD §4. Separate Business Rules, STTM, approved strategy/plan, and test scenario/case inventories were unavailable.

- The sample template's 11 RTM columns are used without substituting project requirements from the example.
- BR-001 to BR-010 are assigned identifiers for the BRD's numbered requirements 1–10; source numbering is retained.
- References to Test Strategy and Test Plan are to draft documents only. TP-01 to TP-12 identify proposed plan activities, not detailed test scenarios or cases.
- Priorities are TBD. No requirement, acceptance criterion, business rule, or Test Scenario/Test Case ID is invented.

> **Status distinction:** “Not Yet Created” means a detailed scenario or case has not been supplied. It is not evidence that the requirement is tested. Clarification gaps are detailed in Section 4.

2. Requirement Traceability Matrix

Matrix follows the sample template's columns. Requirement text is traced to the original BRD; Test Strategy/Plan references are explicitly draft-only.

Requirement ID	Requirement Description	Requirement Source	Business Rule Reference	Test Strategy Reference	Test Plan Reference	Test Scenario ID	Test Case ID	Priority	Coverage Status	Remarks
BR-001	Load all valid customer records into the customer dimension (Dim_Customer).	BRD v1.0 §4 #1; target §3	BRD §4 #1; separate rules not supplied.	Draft Strategy §§8, 10.	Draft Plan TP-02; trace BR-01.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define “valid,” required fields, business key, mapping, reject rules, and measurable completeness. No detailed scenario/case; STTM unavailable.
BR-002	Ensure every account belongs to a valid customer.	BRD v1.0 §4 #2; accounts.csv	BRD §4 #2; separate rules not supplied.	Draft Strategy §§8, 10.	Draft Plan TP-03; trace BR-02.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define relationship key, customer validity, and orphan disposition. No detailed scenario/case; STTM unavailable.
BR-003	Ensure every transaction references a valid account.	BRD v1.0 §4 #3; transactions.csv	BRD §4 #3; separate rules not supplied.	Draft Strategy §§8, 10.	Draft Plan TP-04; trace BR-03.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define account key/validity and handling of missing or invalid references. No detailed scenario/case; STTM unavailable.
BR-004	Validate branch information against the branch master (branch_master.xlsx; Dim_Branch).	BRD v1.0 §4 #4; §§2–3	BRD §4 #4; separate rules not supplied.	Draft Strategy §§8, 10.	Draft Plan TP-05; trace BR-04.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define match key/comparison and unmatched/conflicting branch disposition. No detailed scenario/case; STTM unavailable.
BR-005	Handle duplicate source records according to business rules.	BRD v1.0 §4 #5	BRD §4 #5; duplicate rule not supplied.	Draft Strategy §§8, 10.	Draft Plan TP-06; trace BR-05.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define retain/reject/deduplicate policy, business key, precedence, and audit outcome. No detailed scenario/case.
BR-006	Reject invalid records or move them to an error table.	BRD v1.0 §4 #6	BRD §4 #6; reject rules not supplied.	Draft Strategy §§8, 9.	Draft Plan TP-07; trace BR-06.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define invalidity criteria, reject destination/schema, partial-load policy, and count reconciliation. No detailed scenario/case.
BR-007	Load transaction amounts accurately into the warehouse (Fact_Transaction).	BRD v1.0 §4 #7; target §3	BRD §4 #7; amount rules not supplied.	Draft Strategy §§8, 10.	Draft Plan TP-08; trace BR-07.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define amount mapping, currency, precision/scale, sign, conversion, and rounding. No detailed scenario/case; STTM unavailable.
BR-008	Reconcile source and target record counts.	BRD v1.0 §4 #8	BRD §4 #8; count rules not supplied.	Draft Strategy §§8, 10.	Draft Plan TP-09; trace BR-08.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define batch/entity grain, count formula, reject/duplicate treatment, and tolerance. No detailed scenario/case.
BR-009	Process incremental changes correctly.	BRD v1.0 §4 #9	BRD §4 #9; incremental rules not supplied.	Draft Strategy §§8, 9.	Draft Plan TP-10; trace BR-09.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define insert/update/delete detection, watermark, replay, late arrivals, corrections, and history. No detailed scenario/case.
BR-010	Log ETL package failures and rejected records.	BRD v1.0 §4 #10	BRD §4 #10; operational rules not supplied.	Draft Strategy §§8, 9.	Draft Plan TP-07, TP-11; trace BR-10.	Not Yet Created	Not Yet Created	TBD	Not Yet Created	Define required run/error fields, log location/retention/access, and recovery expectations. No detailed scenario/case.

No separate Business Rules or STTM document was available; BRD references are not represented as substitutes for approved detailed rules or mappings.

3. Coverage Analysis and Validation

Measure / validation	Result	Finding
Requirements identified and mapped to source	10 of 10	Every numbered BRD v1.0 §4 requirement is retained and linked to its original number.
Covered / Partially Covered	0 / 0	No detailed scenarios, cases, or execution evidence were provided.

Measure / validation	Result	Finding
Not Covered	0 assigned as status	No requirement was assigned this status; all ten are explicitly Not Yet Created because detailed artifacts are pending.
Not Yet Created / Clarification Required	10 / 10	No detailed scenario or case exists; every requirement has an unresolved expected-result or rule dependency recorded in Remarks.
Not Applicable	0	No requirement was confirmed as not applicable.
Requirement source traceability	Checked	BR-001–BR-010 map sequentially to the BRD's numbered requirements 1–10.
Strategy and plan links	Checked; draft only	References point to the existing draft documents; TP-IDs are plan activities, not test scenario/case IDs.
Invented scenario/case IDs	None	Scenario ID and Test Case ID columns use Not Yet Created throughout.
Test cases without requirements / unmapped scenarios	Not assessable	No independent scenario or test-case inventory was supplied, so orphan-test traceability could not be verified.

Validation conclusion: Requirement-to-source mapping is complete for the ten stated BRD requirements. Test coverage is not established. No coverage percentage or execution result is claimed.

4. Gaps and Questions for the Author

#	Gap / coverage impact	Question for owner	Impact
G-01	Test Strategy and Plan are drafts, not approved baselines.	Have authorized QA, business/data, and ETL owners reviewed and approved both?	Blocks formal RTM baseline.
G-02	Separate Business Rules, STTM, and full target schemas are unavailable.	Can owners provide approved mappings, keys, conversions, derived fields, validation rules, and constraints?	Blocks definitive transformation, relationship, amount, and reconciliation expectations.
G-03	Valid record criteria and relationship keys are undefined.	Which fields, domains, business keys, and orphan-reference rules determine validity?	Blocks BR-001 to BR-003 expected results.
G-04	Branch matching and unmatched-record handling are unspecified.	Which matching key/rules apply, and what happens to unmatched or conflicting branches?	Blocks BR-004 expected results.
G-05	Duplicate and invalid-record disposition is ambiguous.	What duplicate precedence, reject criteria/destination, error schema, and partial-batch policy apply?	Blocks BR-005/006 and reject reconciliation.
G-06	Amount semantics and tolerance are unspecified.	What currency, precision, scale, sign, conversion, rounding, comparison grain, and tolerance apply?	Blocks BR-007 pass/fail.
G-07	Count-reconciliation grain and formula are unspecified.	What batch/entity boundaries and count rules apply, including rejects, duplicates, and allowed differences?	Blocks BR-008 sign-off.
G-08	Incremental, history, replay, and restart semantics are unspecified.	How are changes detected and watermarks advanced; how are late arrivals, corrections, and reruns treated?	Blocks BR-009 and recovery coverage.
G-09	Test environment, safe data, logging, privacy controls, and defect workflow are incomplete.	Who supplies the test runtime/database, data, access, logs, retention, and approved tracking workflow?	Blocks execution readiness.
G-10	No detailed scenarios/cases, priority rules, or measurable acceptance thresholds exist.	When will scenario/case IDs, P0/P1/P2 criteria, and acceptance thresholds be approved?	Coverage remains Not Yet Created.
G-11	The BRD has no explicit non-functional requirements or targets.	Are performance, security/privacy, availability, recovery, or other non-functional requirements applicable?	Required to confirm complete scope.

5. Summary of Coverage

- **Total requirements:** 10. All trace to numbered requirements in BRD v1.0 §4.
- **Covered:** 0. **Partially Covered:** 0. **Not Covered:** 0 assigned as status. **Not Yet Created:** 10. **Clarification Required:** 10.
- No test scenarios or detailed test cases were supplied. No coverage percentage or execution result is claimed.
- Draft Test Strategy/Test Plan references are provisional. Plan activity IDs are not scenario or case IDs.

Human Review Gate

Document status: DRAFT — PENDING HUMAN REVIEW. Not approved.

Documents used: Banking Data Warehouse BRD v1.0; Banking ETL Test Strategy v1.0 and Test Plan v1.0, both Draft — Pending Human Review; RTM Creator instructions; provided Requirements/SampleTemplate.md. No separate Business Rules, STTM, detailed scenario/case inventory, or organization details were available.

Summary: 10 requirements identified; Covered 0; Partially Covered 0; Not Covered 0 assigned; Not Yet Created 10; Clarification Required 10. Requirement-to-BRD numbering was checked. Orphan test-case mapping is not assessable because no test inventory was supplied.

Assumptions: No business behavior, expected results, priorities, scenario IDs, or case IDs were invented. BR-001–BR-010 label the existing BRD numbering. Strategy/plan references are explicitly draft-only.

Approval blockers: Approve or revise the strategy and plan; supply approved business rules, STTM, and schemas; resolve G-03 through G-11; agree measurable acceptance and priority rules; create and review real scenario/case IDs.

Review request: QA, business/data, and ETL owners should validate the requirement mappings, answer the open questions, provide approved scenario/case references, and explicitly approve or request changes.

Decision: ☐ Approve after updates ☐ Return with edits Reviewer: _____ Date: _____

End of draft — do not treat as baselined or approved until authorized human reviewers have recorded their decision.
